### Professionally Treat Your Skin With Scientific Skincare

June 30, 2010

Lifting Serum

pH Balancing Cleanser

Daily Hydrating Cream

*"I created the Scientific skincare line to combine the best ingredients with the most advanced science to help the skin look and feel its best at any age. My clinical experience has given me the ability to write about cosmeceuticals extensively. I am constantly seeking out new ingredients that improve the tone, texture and pigment of your skin, minimizing the appearance of fine lines and wrinkles. When I recommend a skin care product to my patients it is only after extensive research into the science behind every ingredient, thus the name Scientific for this line of products."*

*Kenneth Beer, MD*

Scientific Skincare was not a brand I was familiar with until I recently was sent samples to try. After using the following products for about 4 weeks, I am pretty impressed with the line! Here are the products I tried with descriptions from the website:

pH Balancing Cleanser (\$37.50 USD) — Cleanses the skin without stripping its natural moisture barrier. Glycolic Acid exfoliates while our 13 Botanical Extracts nourish the skin to help restore luminosity and leave the skin soft and supple. pH Balancing Cleanser helps to unclog pores and prepares the skin for additional products and treatments.

Lifting Serum (\$118.00 USD) — Close your eyes and imagine that you need to look 10 years younger... for just a few hours. Lifting Serum helps grant your wish by reducing the appearance of fine lines and wrinkles around your eyes, lips and face.

Daily Hydrating Cream (\$78.00 USD) — Developed by Dr. Beer and tested for all skin types, Daily Hydrating Cream helps to moisturize the skin with two of its key ingredients (Hyaluronic Acid and Squalane). With daily use, Retinol helps improve the tone, texture and pigment of your skin, minimizing the appearance of fine lines and wrinkles.

What I think: I enjoy many things about these products. First they are fragrance-free, which shows that they don't think adding unneeded extras is important. The cleanser suds up nicely and really cleans my skin without leaving it dry. The lifting serum instantly smooths out my skin and does make me look younger while cream hydrates so well. I have to be careful not to put too much serum on, or my face gets sticky. One and a half pumps seems to work the best.

In the month I have been using these product, my skin looks more even and is glowing! To learn more and to purchase, visit [www.scientificskin.com](http://www.scientificskin.com).
