White Bamboo Exfoliator by Scientific

A good exfoliator should be part of everyone's skin care regimen no matter what season it is. The product directions state that you should use White Bamboo Exfoliator twice a week in the shower. While I sometimes use it in the shower, it works just fine using warm water when out of the shower. It's important to use warm water during application because warm water opens your pores. WBE contains bamboo crystals that help to create new, fresh skin. If you're looking for something to help with deep cleaning that will also get rid of all of your dead skin then White Bamboo Exfoliator is definitely for you. You notice results almost immediately and you continue to see them in soft, smooth skin.
